PROJECTS

- Realtime Chat Application (12/2020)**
 - This App is developed using Java, XML and Firebase.
 - It shows the list of all the registered users in our database and the user can send or accept the friend request and begin the conversation.
 - The user can send images, videos and messages.
 - Messages are encrypted using AES encryption.
- Fresher's Portal Application (02/2021)**
 - Android App built for college alumni and the students.
 - Have features to upload pdf, papers, and any study material.
 - Students and Alumni may upload the blogs that will be visible to other users.
 - It was the college project under BSC club and I was responsible for all authentication part, blog post(saving and fetching data from firebase) and search functionality for study material.
- Password Management System (07/2021)**
 - It is a web application built using node.js, express.js and MongoDB.
 - Every user can keep track of their different username and password for different sites.
 - For HTML template, I used EJS view engine.
